

CONSTRUCTING GREEN.

LEED, or Leadership in Energy and Environmental Design, was established by USGBC as a “green” building certification system, providing benchmarks for the design, construction, and operation of green buildings. Directly associated with USGBC is the Green Building Certification Institute (GBCI). Together the two parties offer verification that the LEED features of a project have met the standards established by the LEED rating system.

Projects are awarded LEED points, based on a 100-point scale. Points for New Construction are grouped into the following areas: Sustainable Sites, Water Efficiency, Energy and Atmosphere, Material and Resources, and Indoor Environmental Quality, with bonus points awarded for Innovation in Design and Regional Priority.

RQ has incorporated Sustainable Design features into our projects since the company’s inception. Below is a list of our LEED®-qualifying projects.

LEED GOLD

Command and Control 1st AD Headquarters - Fort Bliss
Company Operations Facility - Fort Irwin
Child Development Center - Fort Irwin
New Dormitory - Davis-Monthan AFB
Bachelor Enlisted Quarters Complex - Wallace Creek*
